Hardy Nursery Stock

I. E. ILGENFRITZ SONS CO.

The Monroe Nursery - Monroe, Michigan

OUR CATALOG IN 1851

FRUIT TREES!

MONROE NURSERY And Horticultural Gardens.

The constantly increasing demand upon this establishment for trees during the last two years, has induced the proprietor greatly to enlarge the extent of his grounds, and the number, variety and quantity of his fruit and ornamental trees. This entire establishment is conducted personally by the proprietor, and upon the principle that a tree from the seed, to the time it is set in the orchard, should be in a constantly growing and thrifty state. To effect this, the grounds are kept constantly cultivated and free from weeds and grass, the great cause of so many of our nurseries producing black hearted trees, not worth the setting if they could be had for nothing. One great reason for the unparalleled success of this establishment, lies in the fact, that trees from this nursery can be relied upon for producing fruit, true to their name and kind. 30,000 trees will be ready for delivery the coming Autumn, of the following varieties.

VARIETY OF APPLES.

In Addition to the Above Standard

FRUITS, the finer varieties are also cultivated, such as Appricot, Nectrines, Quinces, and Grapes, of the best known varieties, Black, Red and White Antwerp Raspberries, Missouri, Black, Red and White Dutch Currants, with ornamental trees, including the Locust, Silver leaved Poplar, weeping Willow, snail willow, Hercules Club or Tree of Heaven, and a variety of Evergreens; all of which will be sold at prices corresponding to their size and excellence, so that all may be accommodated. The larger and more beautiful trees commanding the prices usually obtained at most nurseries, while the younger, though equally thrifty trees, will be sold at prices lower than ever before offered, the proprietor depending upon large sales rather than large profits upon few trees, for his success in the enterprise. Orders for trees to be sent by public conveyance should always be accompanied with the Cash, to insure prompt attention, and the trees will be packed, labeled and forwarded in all cases with the greatest care.

Monroe, Michigan, August 1st, 1851.

Agent.

SPEARS & TORTON'S PRINT, COMMERCIAL OFFICE, MONROE, MICH.

I. E. Ilgenfritz first planted trees at Monroe in 1843. The first sales were made from his nursery in 1847. The above bulletin is interesting both because it shows the complete list of stock carried at that time and the many varieties listed then which are still today's standard.

Founded 1847

We point with justifiable pride to the many years
of service to home owners of the nation.

Nearly a **CENTURY**

*A vast experience that means much to you
as a buyer of nursery stock.*

When you buy nursery products, you want no "guesswork" about the transaction. First and foremost, you are vitally interested in **DEPENDABILITY**—in the products you buy and the company you buy from.

I. E. Ilgenfritz Sons have served succeeding generations of customers . . . have made the nursery business both a tradition and a fine art . . . and give you full benefit of:

- (1) **A VAST EXPERIENCE** reaching back over almost 100 years . . . four generations in the nursery business.
- (2) **A MANAGEMENT** whose character and integrity is unquestioned . . . and has never failed your fullest confidence.
- (3) **A FINANCIAL STRUCTURE** that has weathered many an economic depression . . . your guarantee that contracts, orders and replacement agreements can be met without hindrance from financial difficulties.
- (4) **A REPUTATION** for fair dealing and sound, lasting value . . . a reputation lived up to today . . . as for generations.
- (5) **A PROGRESSIVE SPIRIT** . . . quick to adopt new ideas as soon as they fully prove their worth . . . Daily tests of new ideas, new methods of plant culture and growth are made in our research department — which maintains closest contact with State and Federal Experimental Stations.
- (6) **A COMPLETE SELECTION** of fine nursery stock . . . unequalled for quality or for variety.

When you buy nursery stock, get the full protection of Ilgenfritz experience, vast resources, and sound policies. They are your best assurance of lasting satisfaction.

Flowering SHRUBS

Flowering shrubs are an essential part of any planting. The wide variety available will give any desired effect. They are easy to take care of and will repay you with flowers year after year. Many of the flowering shrubs bear fruit which attract birds, while others compel attention through their brilliant fall colors. Ilgenfritz Flowering Shrubs are well-rooted, sturdy plants, at least two years old and ready to bloom.

I. E. ILGENFRITZ' SONS CO.

THE
MONROE
NURSERY

MONROE, MICH.

Flowering Quince

Flowering Quince

In early spring the branches of this popular shrub are studded with red flowers. The fragrant fruit makes delicious jelly.

Philadelphus, Virginal

Philadelphus, Virginal

The favorite of recently introduced hybrid Mock-orange. It has waxy, semi-double flowers which are very fragrant and appear intermittently throughout the season. The foliage is larger than that of other types, light green in color. The habit of growth is upright; useful for corner plantings or in the shrub border. 7 ft.

Forsythia Spectabilis

This variety is a prolific bloomer. The rich yellow flowers which are among the first to appear, show that spring has come to stay. It grows up to 10 feet high.

Forsythia Spectabilis

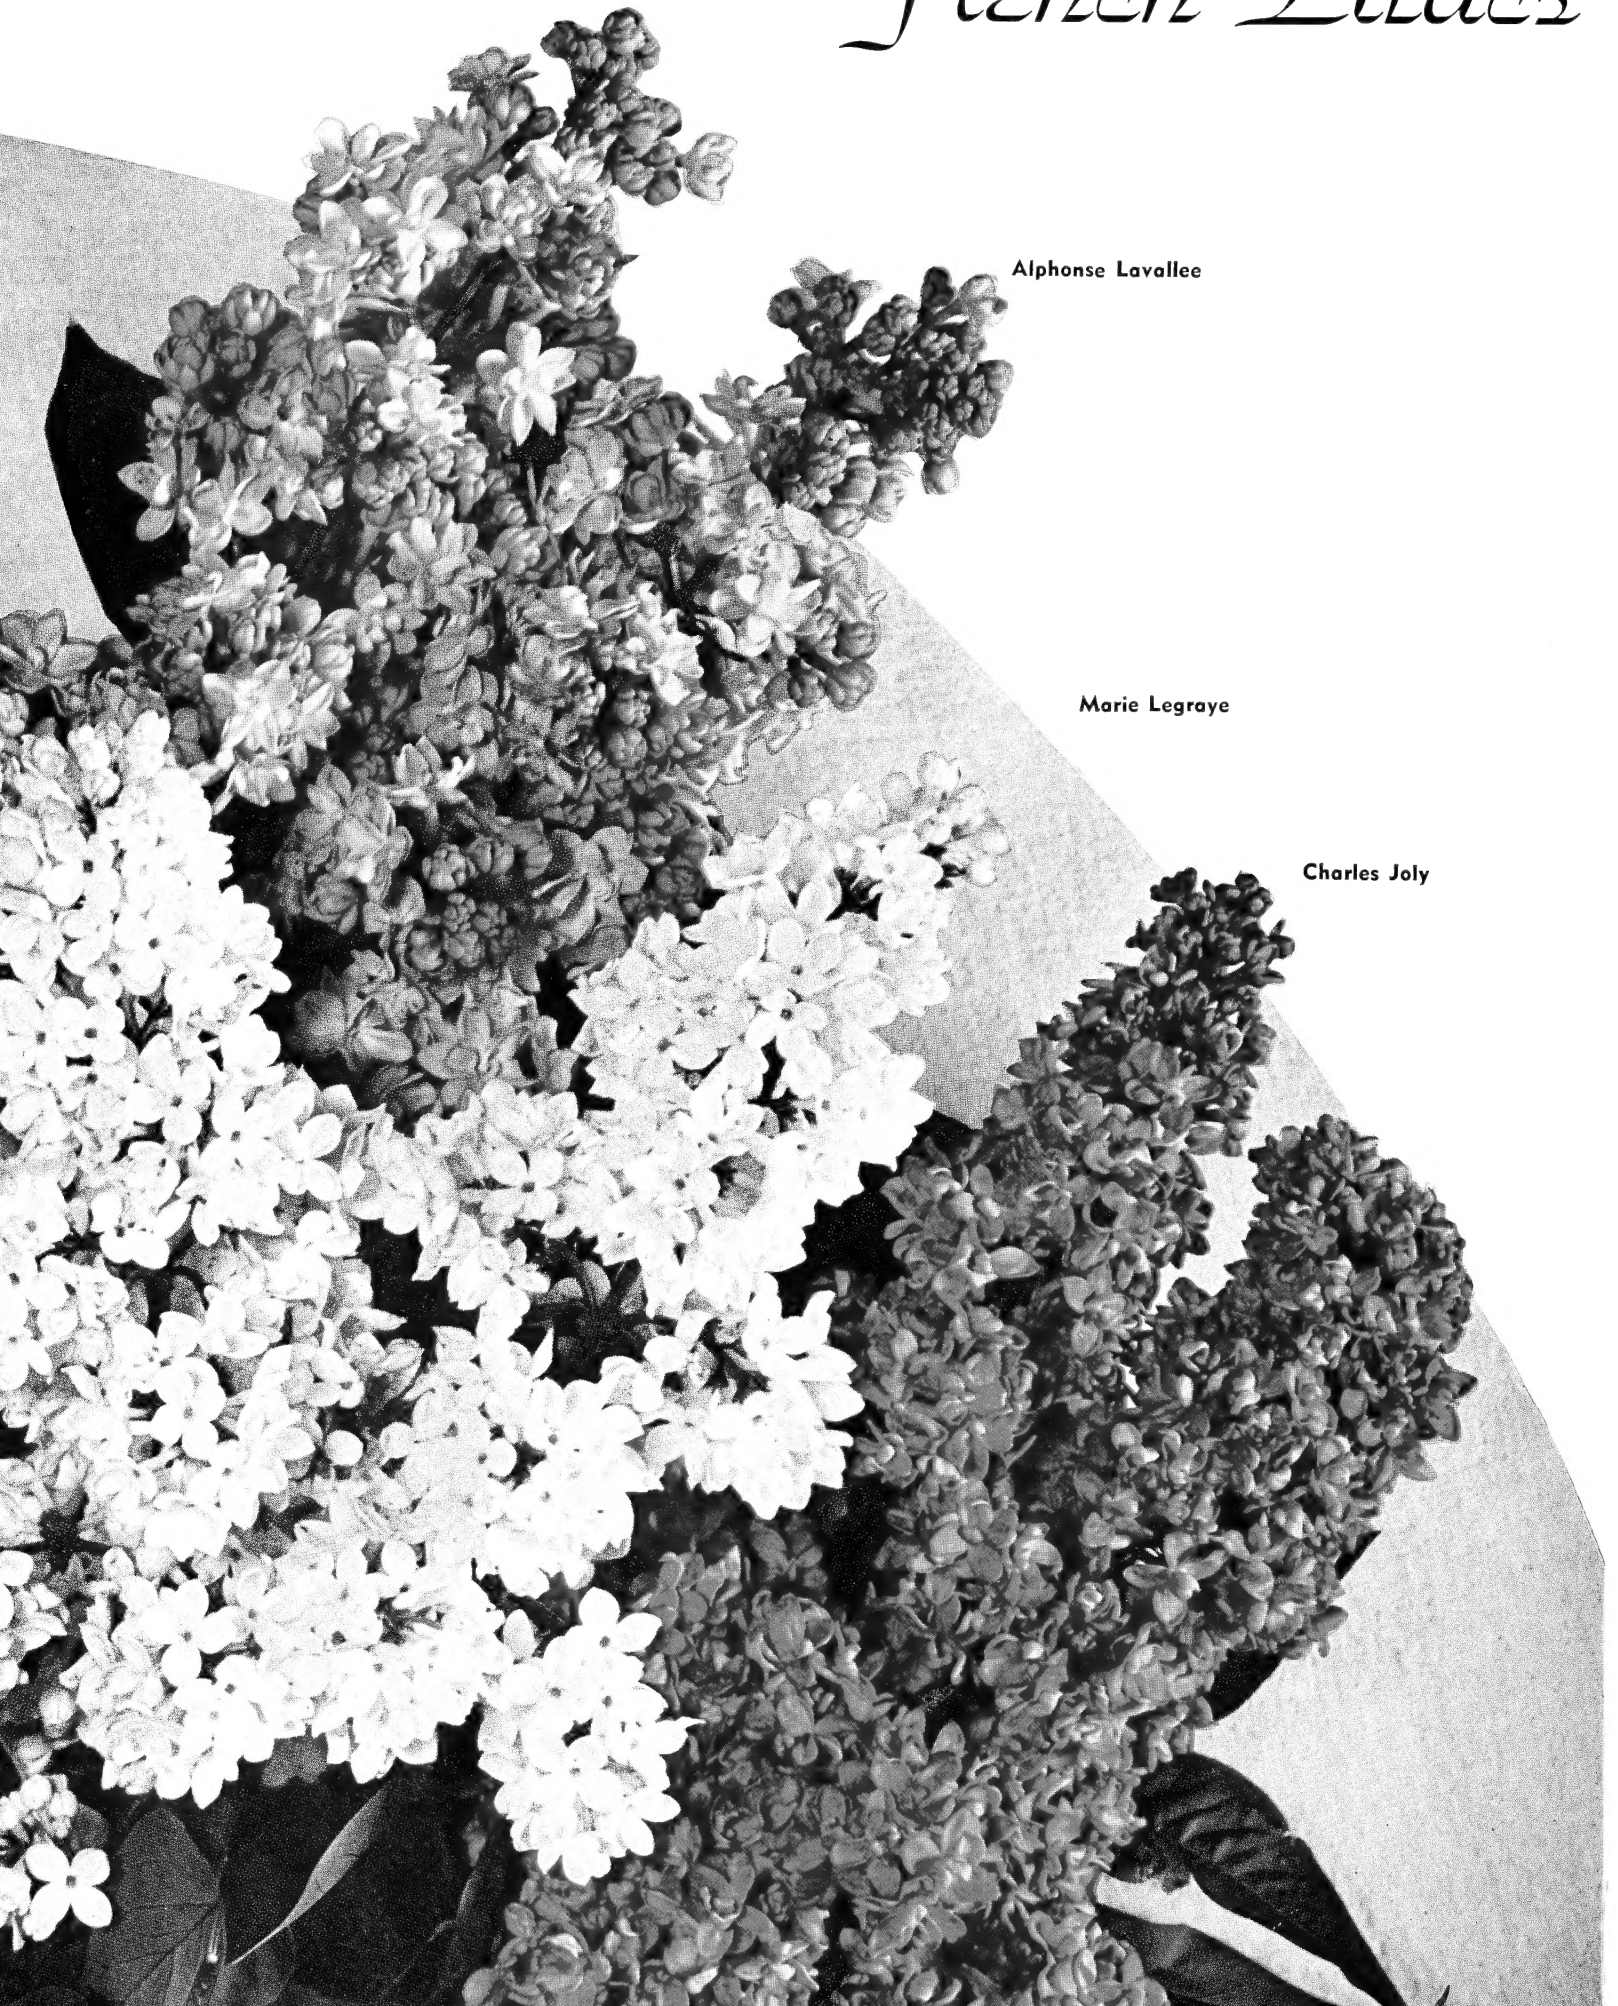

French Lilacs

Alphonse Lavallee

Marie Legraye

Charles Joly

A black and white photograph of three Buddleia butterfly bush flower spikes. The spike on the left is dark and dense, labeled 'Royal Purple'. The middle spike is lighter and more open, labeled 'Charming'. The spike on the right is dark and dense, labeled 'Ile de France'. The background is a light, textured surface.

Buddleia-- **BUTTERFLY BUSH**

Royal Purple

Charming

Ile de France

Barberry (*B. thunbergi*)

Deutzia lemoinei

Deutzia Lemoinei

One of our best dwarf shrubs due to its compact habit and snow-white flowers borne on slender twigs in May. Thrives in shade.

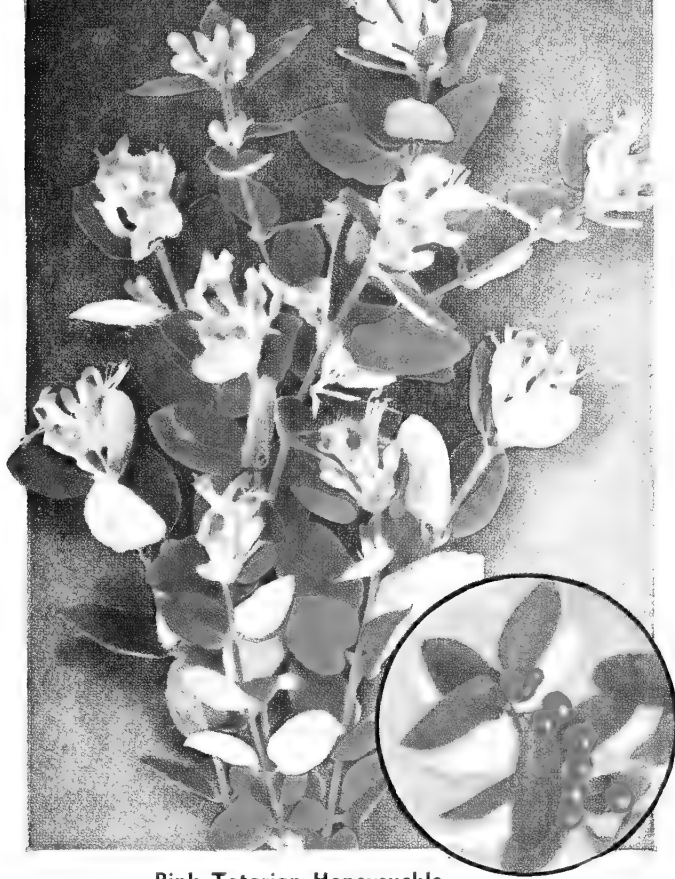

Amur Privet Hedge

We grow a complete selection of plants for high or low, trimmed or natural hedges.

For lasting satisfaction buy Ilgenfritz.

***Spiraea van Houttei* Hedge**

Pink Tatarian Honeysuckle

Pink Tatarian Honeysuckle

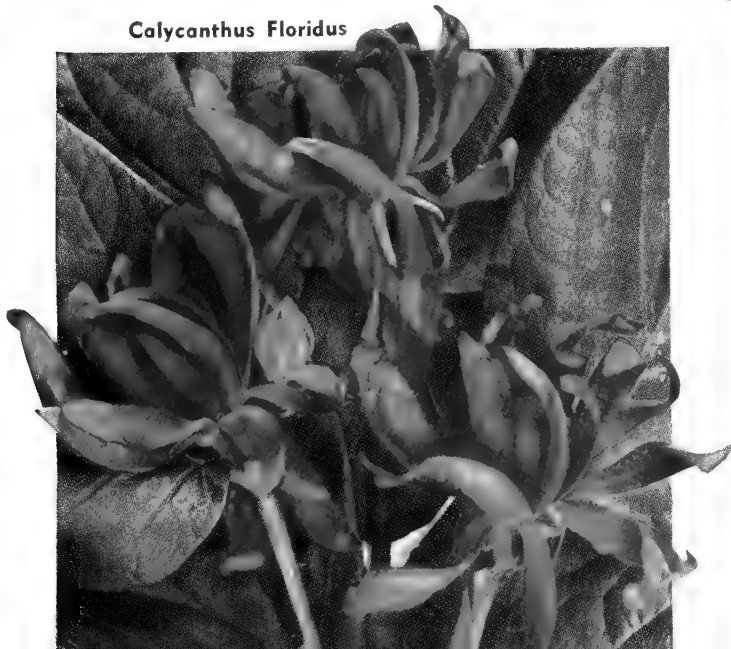

Since Honeysuckles are fast growing, they are often used for hedges. The flowers are followed by red berries which the birds eat. These plants are also available with red and white flowers.

Common Sweet Shrub

Calycanthus Floridus

An old favorite called Sweet Shrub because of the spicy, fragrant, chocolate-colored flowers in June or July. The leaves are large and glossy green; it may be planted in shade.

Calycanthus Floridus

Anthony Waterer Spirea

Anthony Waterer Spirea

This is a very popular variety with rosy crimson, flat flower heads and rather narrow leaves. The stems of the new growth are light in color. The foliage is often tinged with yellow. Branches upright. 2 ft.

Eva Rathke Weigela

A free flowering variety of medium height having deep carmine-red flowers in June and intermittently throughout the summer. An excellent foundation shrub. Light green foliage. 4 ft.

Eva Rathke Weigela

Spiraea Thunbergi

Spiraea Thunbergi

A dainty plant which grows 4 feet high. The foliage is long and lacy; the pure white flowers appear in March or April. Fine for foundation planting.

Regal Privet

Redleaf Barberry

Pussy Willow

**It's a Home

by Ilgenfritz since
1847.**

Pee Gee Hydrangea

Pee Gee Hydrangea

The large panicles of flowers are white when first appearing in early summer, later they change to shades of pink and bronze as the season progresses. It should be pruned severely in early spring.

Snowhill Hydrangea

An upright growing shrub with large clusters of white flowers borne in early summer and lasting until late fall. Leaves are bright green, oval in shape. It should be pruned severely every spring.

Magnolia Glauca

Red Stem Dogwood

Coralberry

Snowberry

Winterberry
(Ilex verticillata)

Persian Lilac

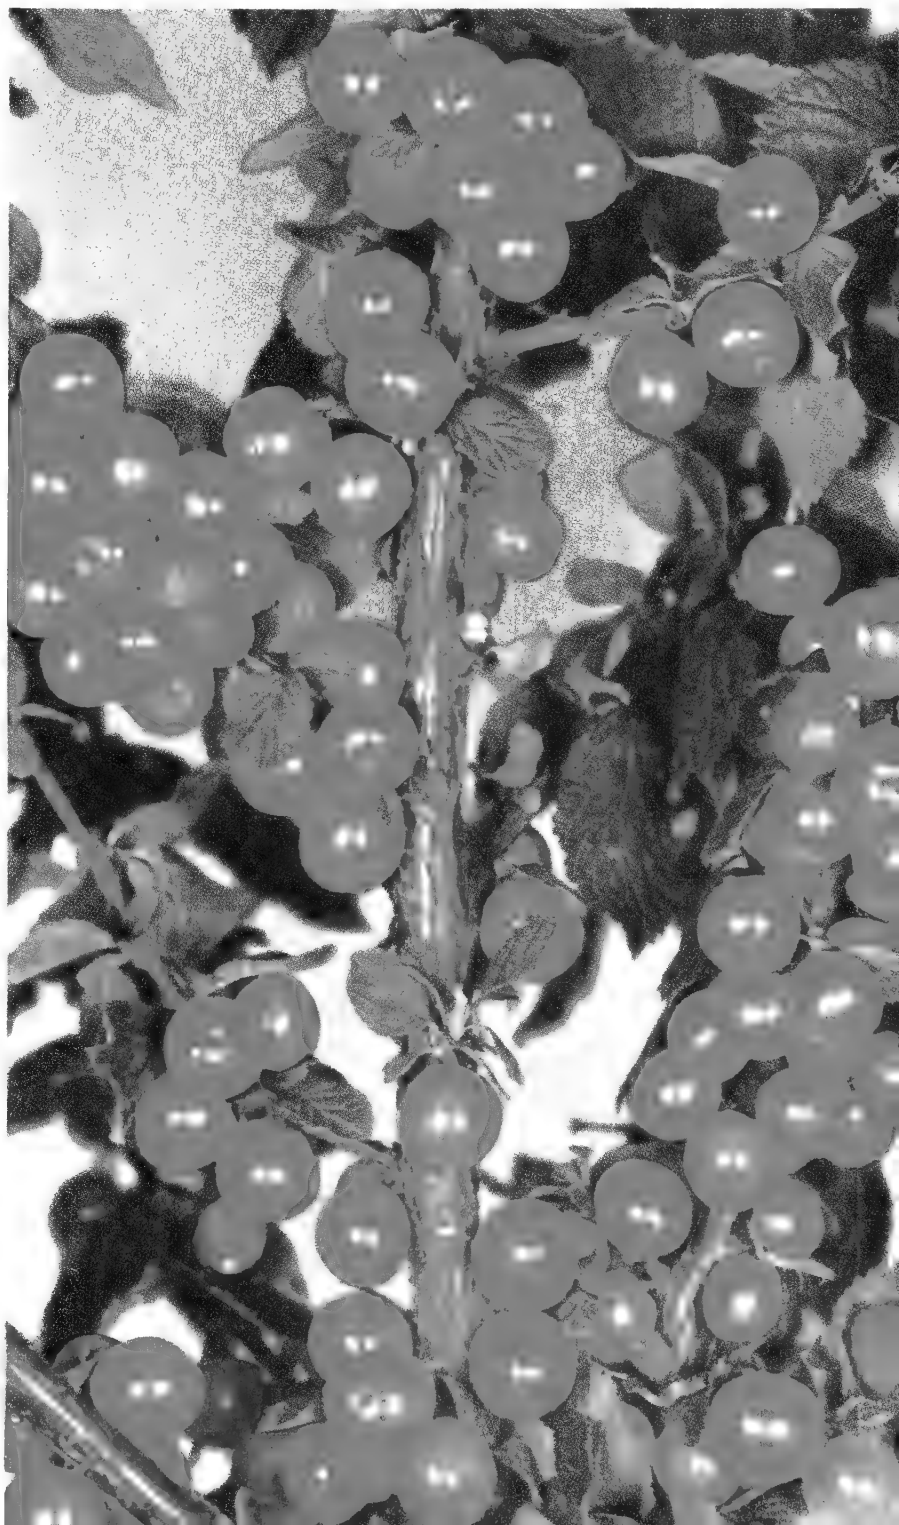

American Cranberry Bush

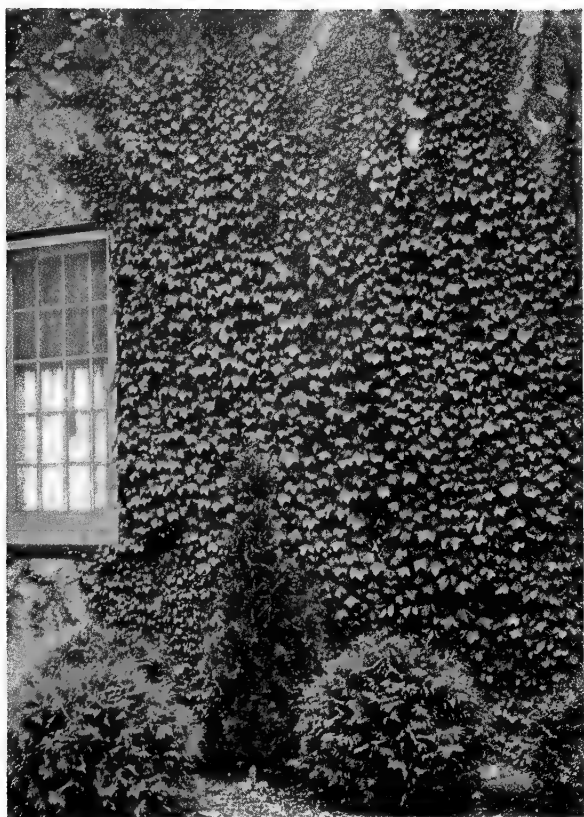

More ILGENFRITZ Shrubs

Nanking Cherry

Will begin to fruit second year. Branches are covered with pink buds in early spring; flowers are white.

Boston Ivy

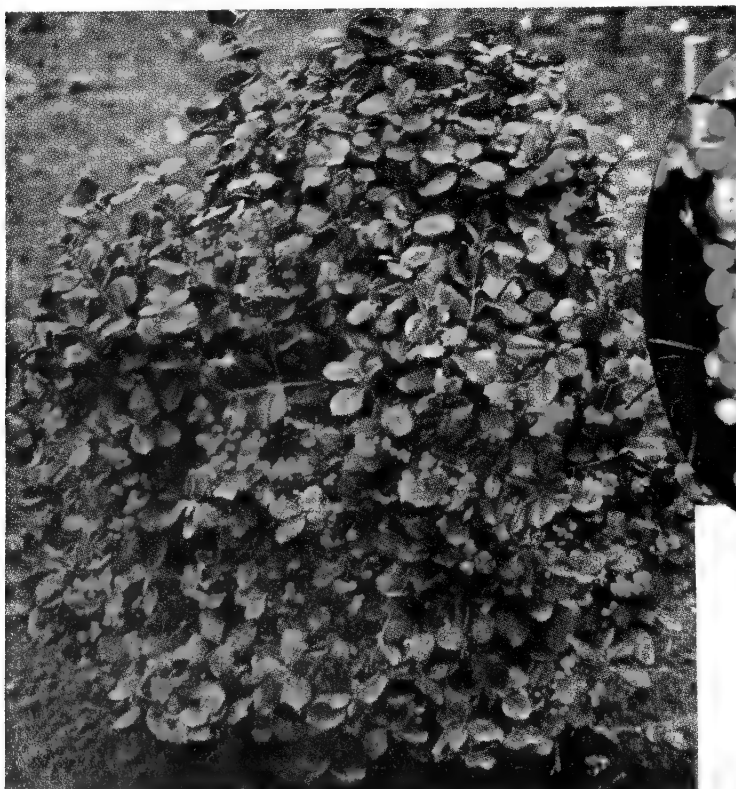

(Above)

Climbs rapidly on walls and provides a dense covering which will keep the home cool.

Evergreen Bittersweet

(*Euonymus vegetus*) (Below)

Evergreen, will climb on walls; berries look like Bittersweet.

Ilgenfritz VINES

Silver Lace Vine

➡ This is the most rapid growing, hardy vine. The foliage is light green and from mid-summer till late fall it is completely covered with silvery lace-like flowers. We recommend it where quick shade and beauty are desired.

Silver Lace Vine

Hall's Honeysuckle

➡ The flowers of this vine are unusually fragrant and attractive to humming birds. Flowers open white then turn to yellow, appearing in early summer and again in September. The fruit is yellow and very showy against the green leaves in winter.

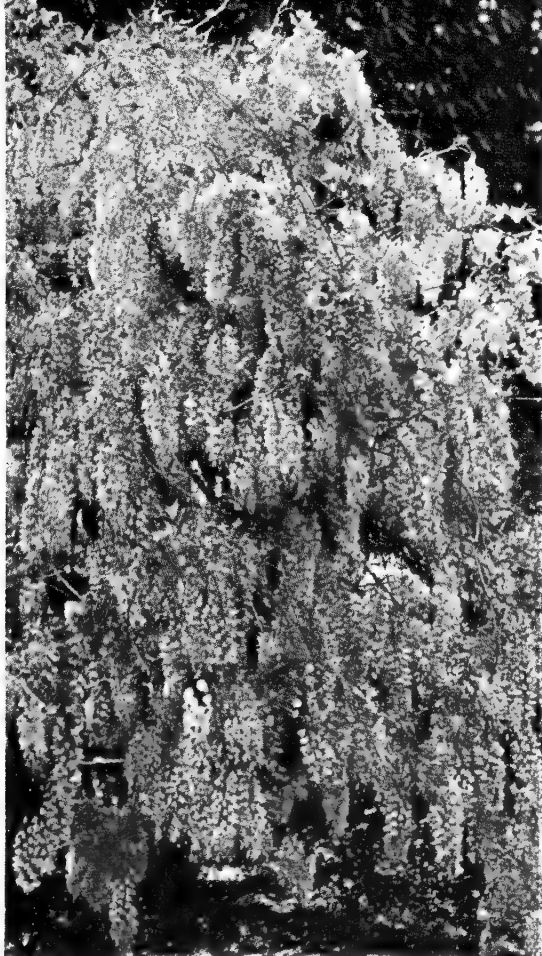

Hall's Honeysuckle

Flaming Gold Honeysuckle

➡ Bright gold-red flowers, blooms all summer; can be trained on trellis.

Purple Wistaria

← **Purple Wistaria**

Fine for arbors or any place where a support for this winding plant can be provided.

Clematis Jackmani →

It will climb rapidly and flower profusely. Usually trained on a trellis.

Jackmani Clematis

Baltic Ivy

Madame Edouard Andre Clematis (Not Pictured)

Red. A lattice covered with this variety will make a striking back curtain for the Rose or Iris garden, growing to a height of 8 feet. It is a free and persistent producer of crimson flowers from July to September.

← **Baltic Ivy**

This Evergreen Ivy should be planted on the north side of the house, as it prefers shade. It is self-supporting and will cover the wall in time. When it is used as ground cover, it should be planted in a shady location as, for example, under shade trees.

Sweet Autumn Clematis →

The starlike flowers are fragrant and cover the entire plant, followed by interlacing seed pods which resemble feathers.

Sweet Autumn Clematis

ILGENFRITZ

Flowering Trees

← Mountain Ash

Red berries which remain through the winter follow the white flowers.

Red Flowering Dogwood →

The large flowers, up to four inches across, outline the horizontal branches. Flowering Dogwood may be planted in shade.

← Redbud

The small pink and red flowers spring up like magic very early, long before the leaves appear. They look odd and startling at first, but create a beautiful picture as they outline the dark branches of the tree against the delicate green of early spring. The finely veined leaves are heart-shaped and put in their appearance soon after the flowers fade.

Double Flowering Plum →

The arching branches are covered in early spring with very full rose-colored flowers.

Newport Plum →

The purple foliage of this tree can be used to advantage where contrast is needed.

← Bechtel Crab

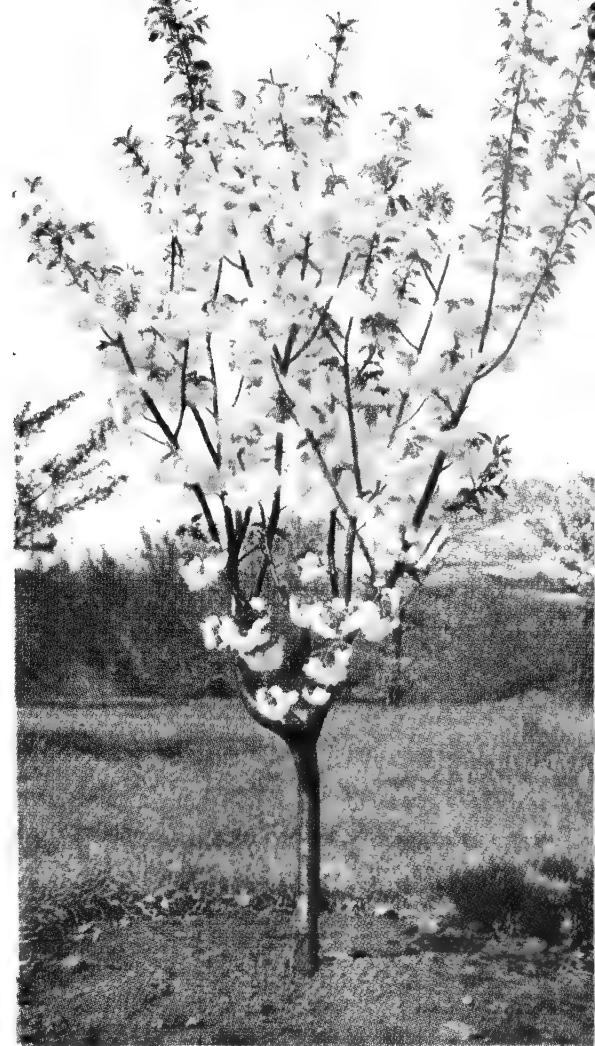

Combines the delicate fresh fragrance of the wild Crabapple with very double flowers, resembling small Roses.

May Day Tree

The shiny bright green leaves appear early. While flowers are not always showy, the profusion of them on May Day Tree attracts attention.

Kwanzan Flowering Cherry

Double pink flowers in abundance.

Flowering Crab (Malus Floribunda)

Moline Elm

A very shapely tree with upright, arching branches and large dark green leaves. The bark is comparatively smooth. It is a rapid grower and exceptionally desirable for use on smaller lots.

Pin Oak

A cone-shaped oak with flowering fall color.

Plant Shade Trees for Cool Comfort and Beauty

I. E. ILGENFRITZ' SONS CO.

THE
MONROE
NURSERY

MONROE, MICHIGAN

Chinese Elm

Very popular because it grows fast. If you want shade in a hurry, this is your tree. The leaves are smooth, bright green, comparatively small, growing compactly, and giving the tree a feathery-like aspect.

Linden

Also known as Basswood. Our American Linden has large leaves and grows faster than the European Linden, which is pictured here.

Shade
Trees
INCREASE
YOUR
PROPERTY
VALUE!

Lombardy Poplar

Used for formal planting; fast growing.

The deep green leaves clothe this beautiful, columnar tree almost to the ground. It is fast growing and excellent for formal effects and high screens.

Norway Maple

Flowers have chartreuse color, leaves turn bright yellow in fall.

Schwedler Maple

The fine characteristics that make the Schwedler Maple a popular favorite are its adaptability to city conditions, its spreading branches forming a round head, and its beautiful foliage. Similar in form and habits of growth to the Norway Maple, it is distinguished by its purplish crimson leaves that change to bronze-green in late summer.

Silver Maple ➡

A fast-growing tree with deeply lobed leaves.

Bloodleaf Maple

(Not Pictured)

The brilliant red foliage of this splendid dwarf tree stands out in any landscape planting. Because of its shape and color, it is an excellent lawn specimen. When planted in full sunlight, the foliage is an attractive red color from the time it appears in spring until the leaves drop in fall, changing in shades throughout the season.

Ami Quinard

AMI QUINARD

Dark red, almost black, velvety petals. Very fragrant and a profuse bloomer.

CALEDONIA

An excellent dependable Rose with pure white flowers borne on a vigorous plant.

Caledonia

GRENOBLE

The scarlet crimson flowers produced on long stems are very fragrant. An outstanding red Rose.

CHRISTOPHER STONE

The long-pointed buds open into a large, semi-double flower of crimson and scarlet.

Hinrich Gaede

HINRICH GAEDE

An excellent variety which produces many buds and flowers during the season, intense colors.

SOUER THERESE

This free blooming plant is among the finest of yellow garden Roses.

TALISMAN

A vigorous, tall Rose with many flowers of interesting color combinations.

Talisman

Hybrid Tea Roses

Mrs. Henry Bowles

MRS. HENRY BOWLES

A dependable variety with deep pink Roses which hold their color well. One of the finest, if not the finest of pink Roses.

EDITOR McFARLAND

Considered by many the best deep pink Rose; the color is very even. Fine pointed buds.

McGREDY'S SCARLET

A favorite of the McGredy Roses, this strong plant produces an abundance of fine flowers.

EDITH NELLIE PERKINS

A very vigorous variety, tall growing and excellent for cutting. The base of the petal is tinted yellow, flesh-pink inside and darker outside.

Mrs. Pierre S. duPont

MRS. PIERRE S. DU PONT

A top-notch yellow Rose with admirable buds. The base is tinted slightly red.

ETOILE DE HOLLANDE

Not a newcomer but the standard of red Roses. Etoile de Hollande is prized for its fine fragrant flowers. It is almost thornless and prefers half shade.

MARGARET McGREDY

This satisfactory variety blooms from early summer till frost without interruption. The stems are long enough to make it a good cut flower.

Margaret McGredy

Edith Nellie Perkins

Climbing American Beauty

Paul's Scarlet Climber

Mme. Gregoire Stachelin

Climbing Rose, Silver Moon

Rosa Hugonis

**POLYANTHA ROSE,
ELSE POULSEN**

One of the newer introductions, semi-double deep pink.

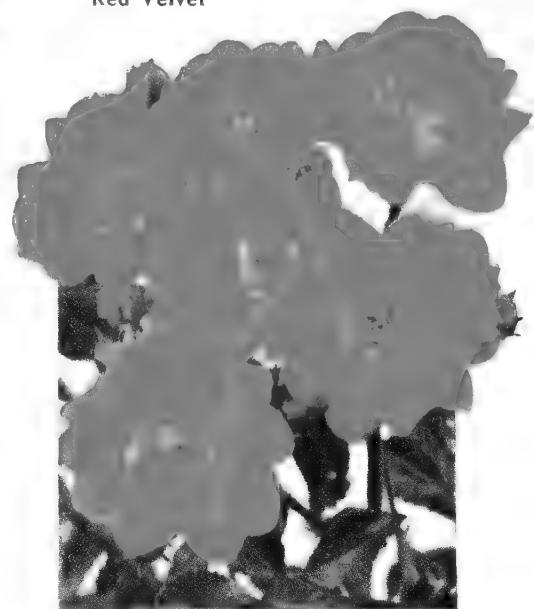

Red Velvet

ROSA HUGONIS

Better known as the "Golden Rose of China"; it develops into a graceful plant about 6 feet high.

**POLYANTHA ROSE,
GOLDEN SALMON**

Named after its striking color combination.

Golden Salmon

**RUGOSA ROSE,
F. J. GROOTENDORST**

Keeps blooming through the whole season; can be kept to a height of 3 feet, left alone it will grow to 6 feet.

**F. J. Grootendorst
Primrose Climber**

**CLIMBING ROSE,
PRIMROSE**

Full yellow flowers cover this climber during spring rose-time.

Else Poulsen

ILGENFRITZ

Evergreens . . .

Give your house distinction, fill you with pride of possession; their size is easily controlled; give your house color in the winter.

Greens, greys, yellows, and blues, and all intermediate shades are available in shapes that are column-like, pyramidal, broadly conical, round, half-upright and creeping.

PFITZER JUNIPER (Below)

Best known and most often seen spreading evergreen. Grows in several layers of horizontal branches, but is usually held down to a height of about 2 feet. It is adaptable to practically all soils and will grow in dry moist places. Like all other evergreens it will become fuller by trimming.

PYRAMIDAL ARBORVITAE

This upright evergreen looks best at a height of 5 or 6 feet. It will grow taller unless it is trimmed. Cut off the top and shape up the sides. Spreading old leaves or grass clippings under it will make it grow better; don't be afraid to water it too much.

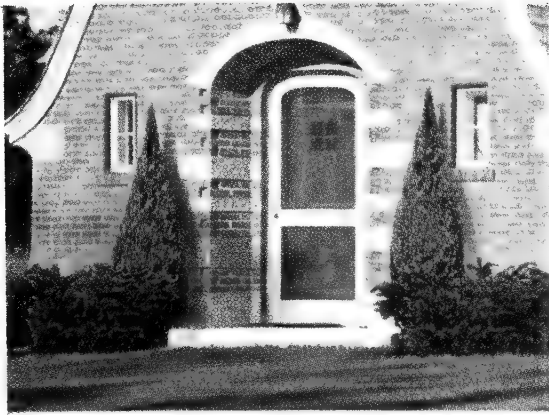

Pfitzer
Juniper

[18]

Pyramidal Arborvitae

**A Suggested Doorway Planting
of Evergreens**

TAXUS CAPITATA

This fine plant may be used anywhere except in wet places. All *Taxus* respond to shearing. Manure worked into the soil on top gives it a dark green lustrous color.

TAXUS HICKSI

A smaller upright form, broader on top.

TAXUS CUSPIDATA

Is the well known "spreading Yew" which has become so popular.

CHINESE COLUMN JUNIPER

A very hardy blue-green Juniper which we highly recommend. It blends into any planting, since its color is neutral. City smoke does not seem to bother it.

Canaert Juniper

CANAERT JUNIPER

Rich dark green color. The small blue berries attract birds in the wintertime.

SPINY GREEK JUNIPER

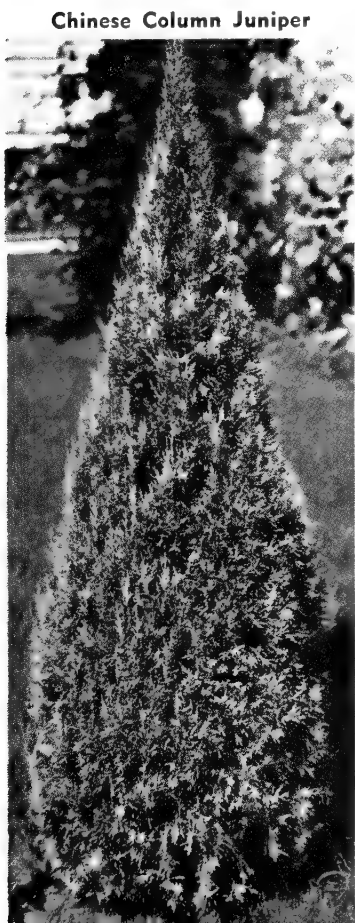

It appears bluish at times. This small and compact plant fits well into evergreen plantings.

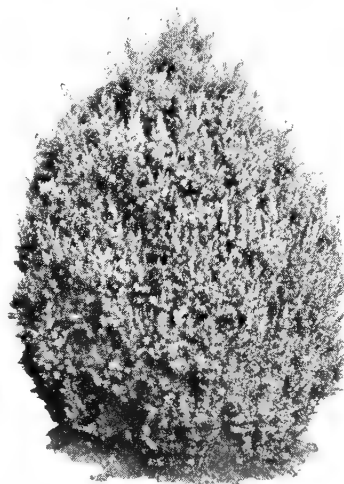

Canadian Hemlock

CANADIAN HEMLOCK

Fine graceful plant which likes a shady spot where it will grow lacy and dark green. The illustration shows one which is growing in full sun.

Chinese Column Juniper

Spiny Greek Juniper

**THE
MONROE
NURSERY**

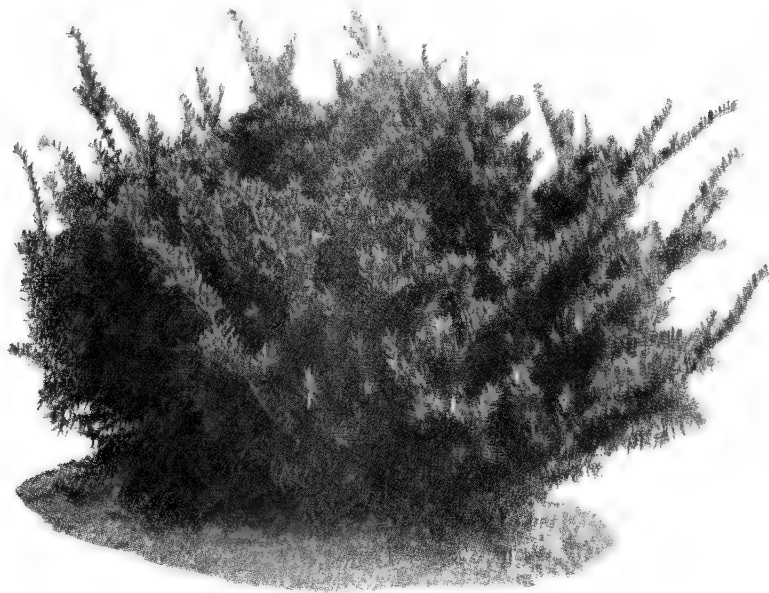

**Taxus
hicksi**

**Taxus
capitata**

**Taxus
cuspidata**

Dwarf Spreading Yew

Dwarf. Spreading branches. Foliage dark glossy green. Endures shady as well as sunny locations. Indispensable for foundation plantings, as a single plant or in groups. Can stand shearing.

MONROE GROWN *Evergreens*

Black Hill Spruce

Very compact, gray-blue spruce. It will grow quite tall in time and requires a space of about ten feet.

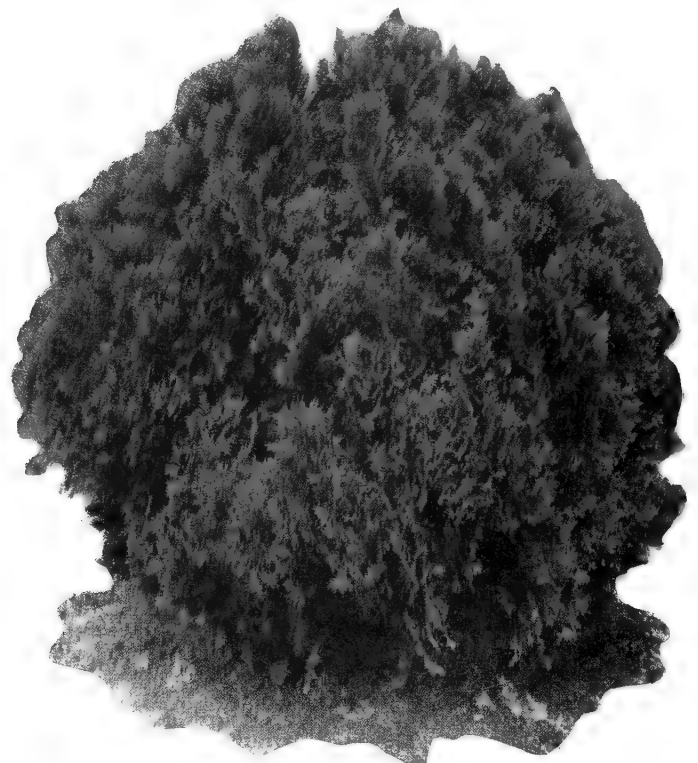

Moerheim Spruce

The King of the Blue Spruces. It holds its color well and develops into a fine symmetrical tree.

Globe Arborvitae

A fine little evergreen where a round plant can be used.

Berkmann Arborvitae

Berkmann Arborvitae

An evergreen which stays small and dense. The color is more green-yellow than shown in the illustration. It should be planted in a protected place and not exposed to strong winds.

I. E. Ilgenfritz' Sons Co.

**THE
MONROE
NURSERY**
Monroe, Mich.

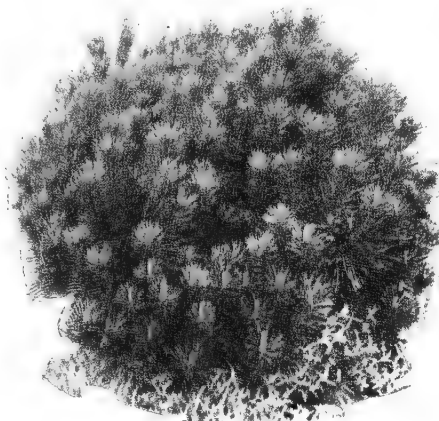

Austrian Pine

This stately Pine has long dark-green needles and grows symmetrically. It does well in sandy soil which is well drained.

Mugho Pine

The dwarf Pine is much used in connection with other small or medium evergreens. Trimming off part of the new soft shoots will make it more compact.

Mugho Pine

Douglas Fir

Red Cedar

An upright growing evergreen which lends itself to trimming. In fall and winter it is decorated with blue berries.

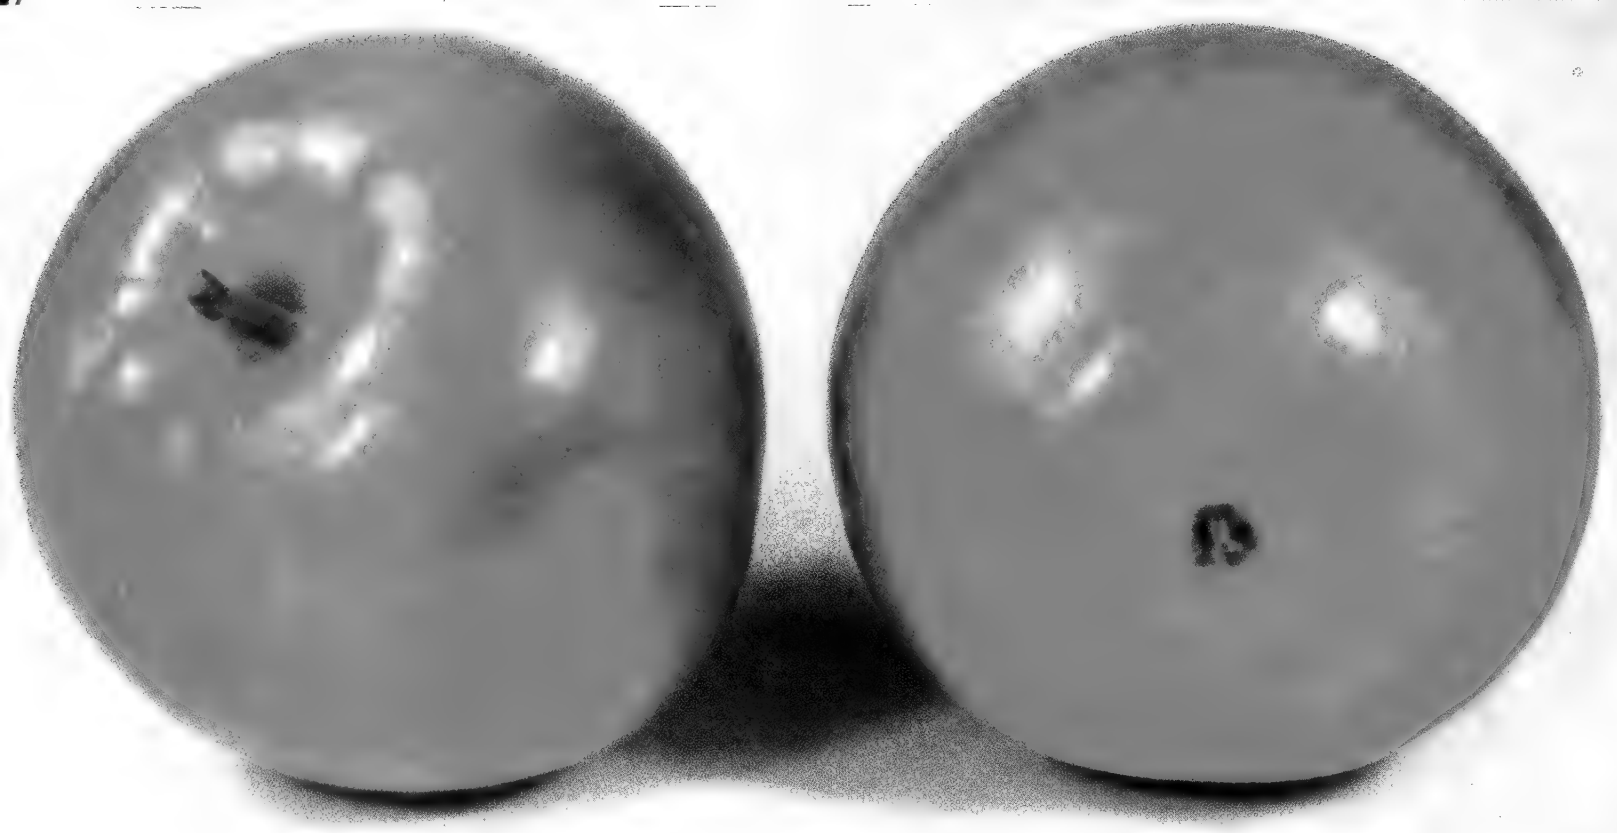

Douglas Fir

A fine, tall-growing uniform evergreen which often has a bluish cast. Fine for high background or specimen planting.

Red Cedar

McIntosh

APPLES

Apple trees have been grown by Ilgenfritz here in Monroe ever since the firm was founded in 1847. We are constantly striving to grow only the best producing strains and to select parent trees with large tasty fruit. In fruit trees it pays to buy the best!

McINTOSH

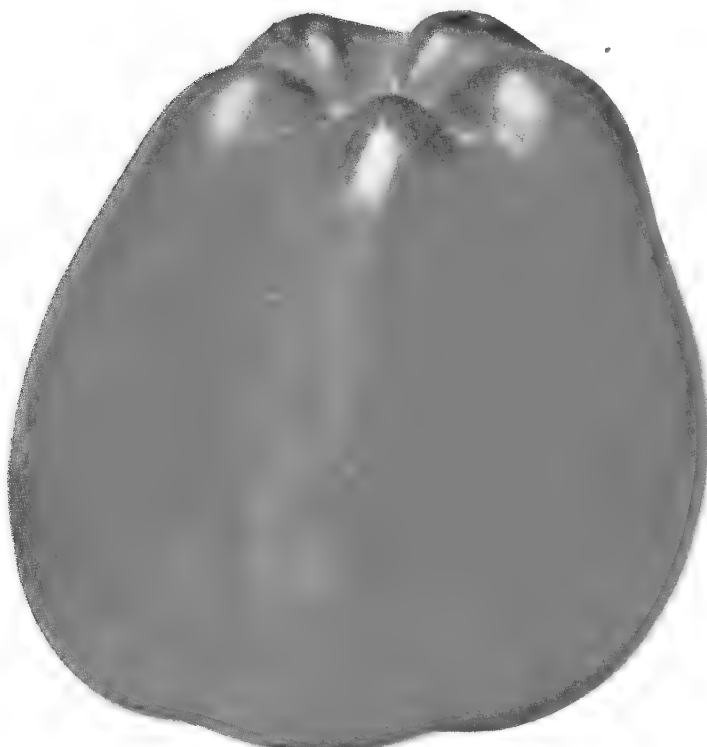

Comes into bearing young. The bright red Apples have white flesh. A winter apple of excellent flavor.

RED DELICIOUS

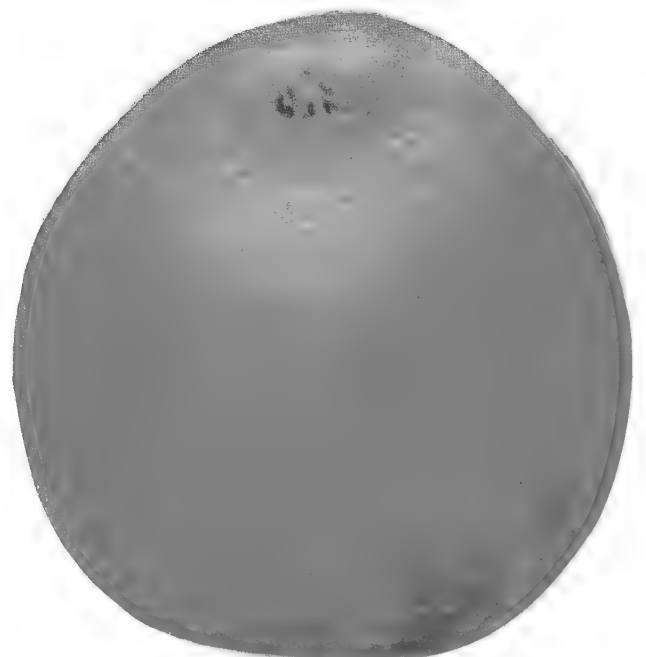

This juicy Apple is really delicious. The trees produce heavily and at an early age.

STAYMAN

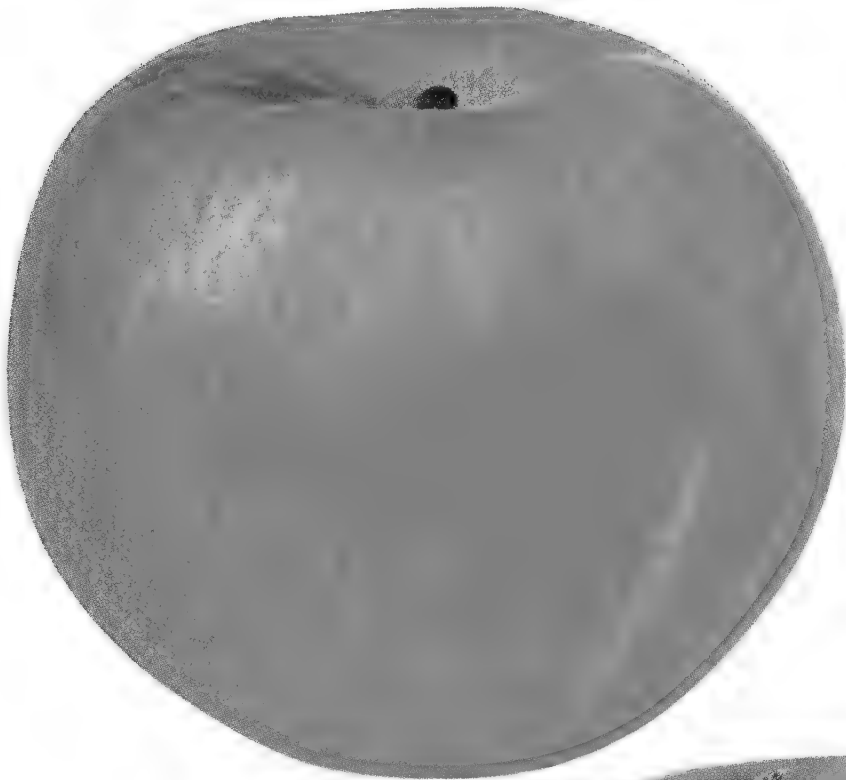

A spicy Winesap Apple which keeps until April.

Red Delicious

Stayman

Northern Spy

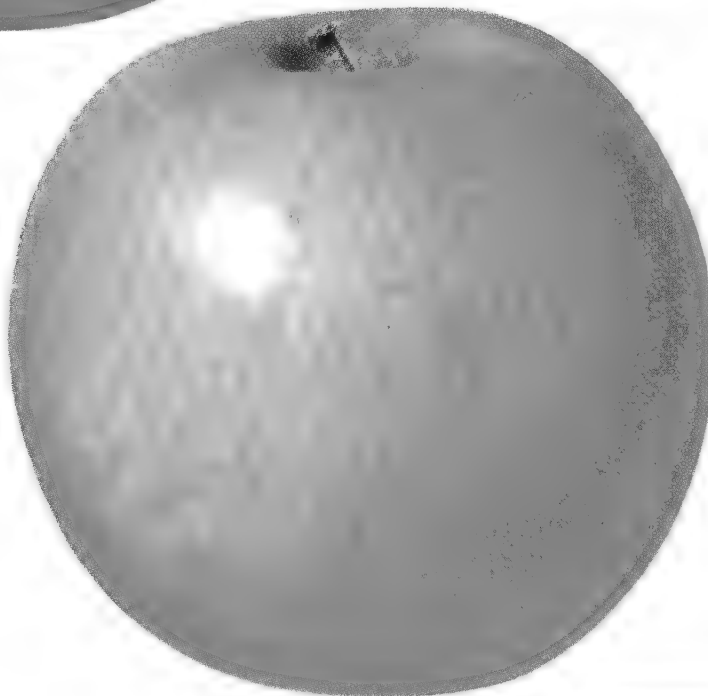

Jonathan

NORTHERN SPY

Comes late into bearing, but worth waiting for. Once it begins to bear, it will furnish an annual crop of large delicious Apples.

YELLOW TRANSPARENT

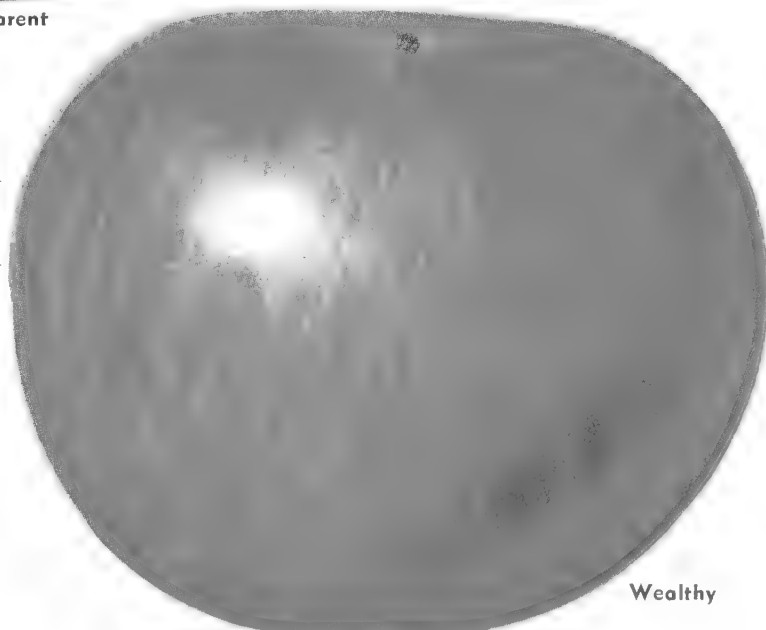

Fine early summer Apple which soon begins to bear. The skin is waxy and yellow, ripens late July.

Yellow Transparent

WEALTHY

This medium-sized tree can take cold temperatures. While the Apple has a yellow background, it is predominantly red; the meat is white and juicy.

NOTE—Change of date or mutilation in any way of this certificate renders it null and void

Halehaven

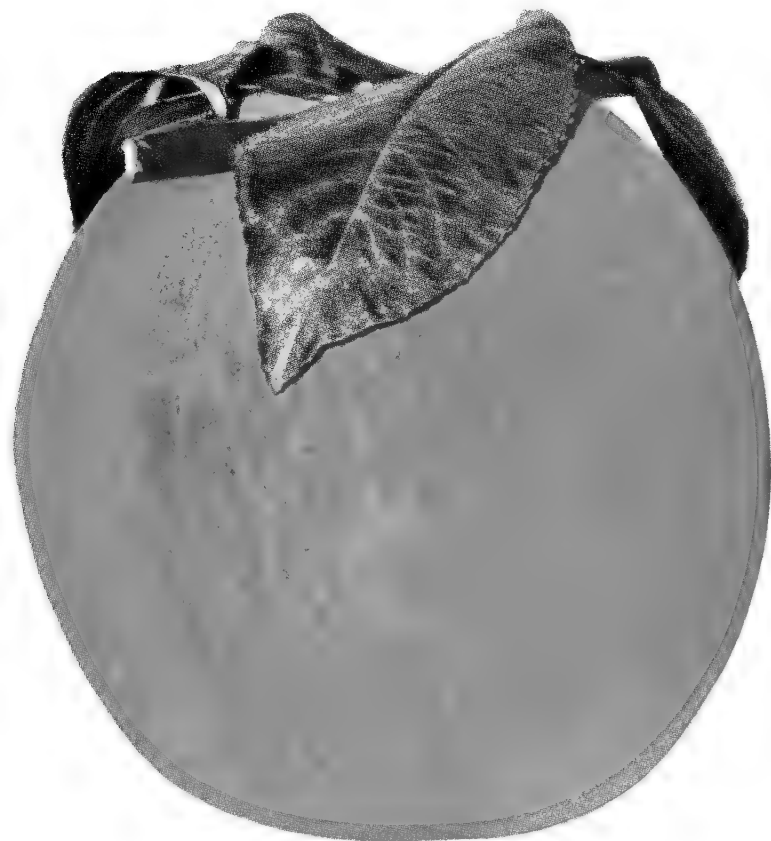

HALEHAVEN

A consistently early and heavy producer. Its fruit is large, highly colored, of excellent quality and flavor.

RED HAVEN

Not as large as shown in the picture, but a good yellow freestone Peach. It ripens early, about August 15th.

Red Haven

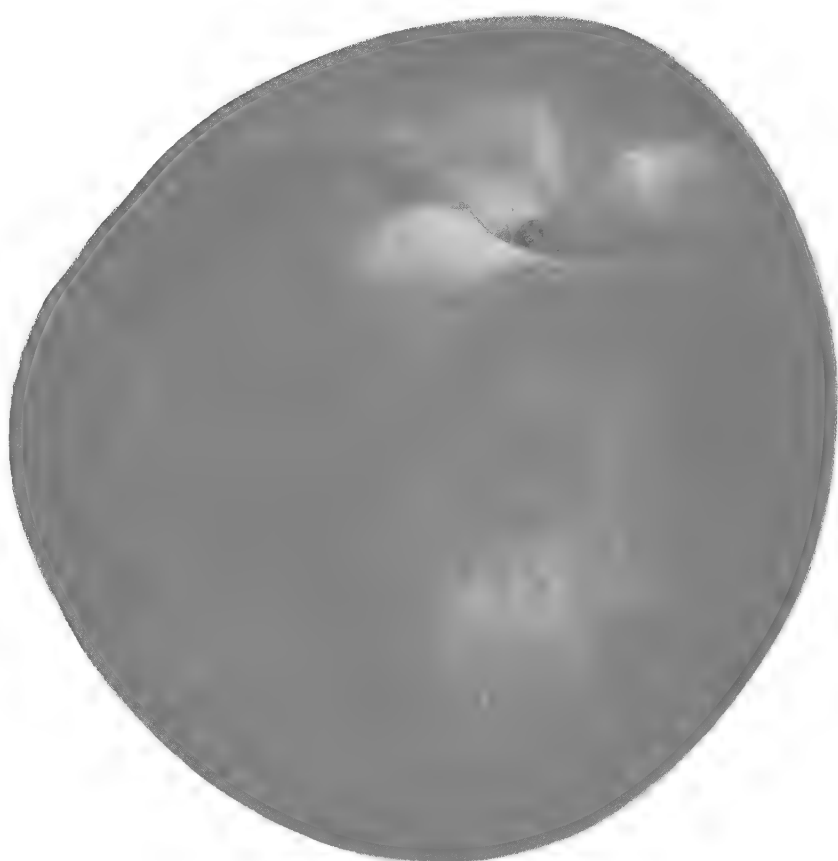

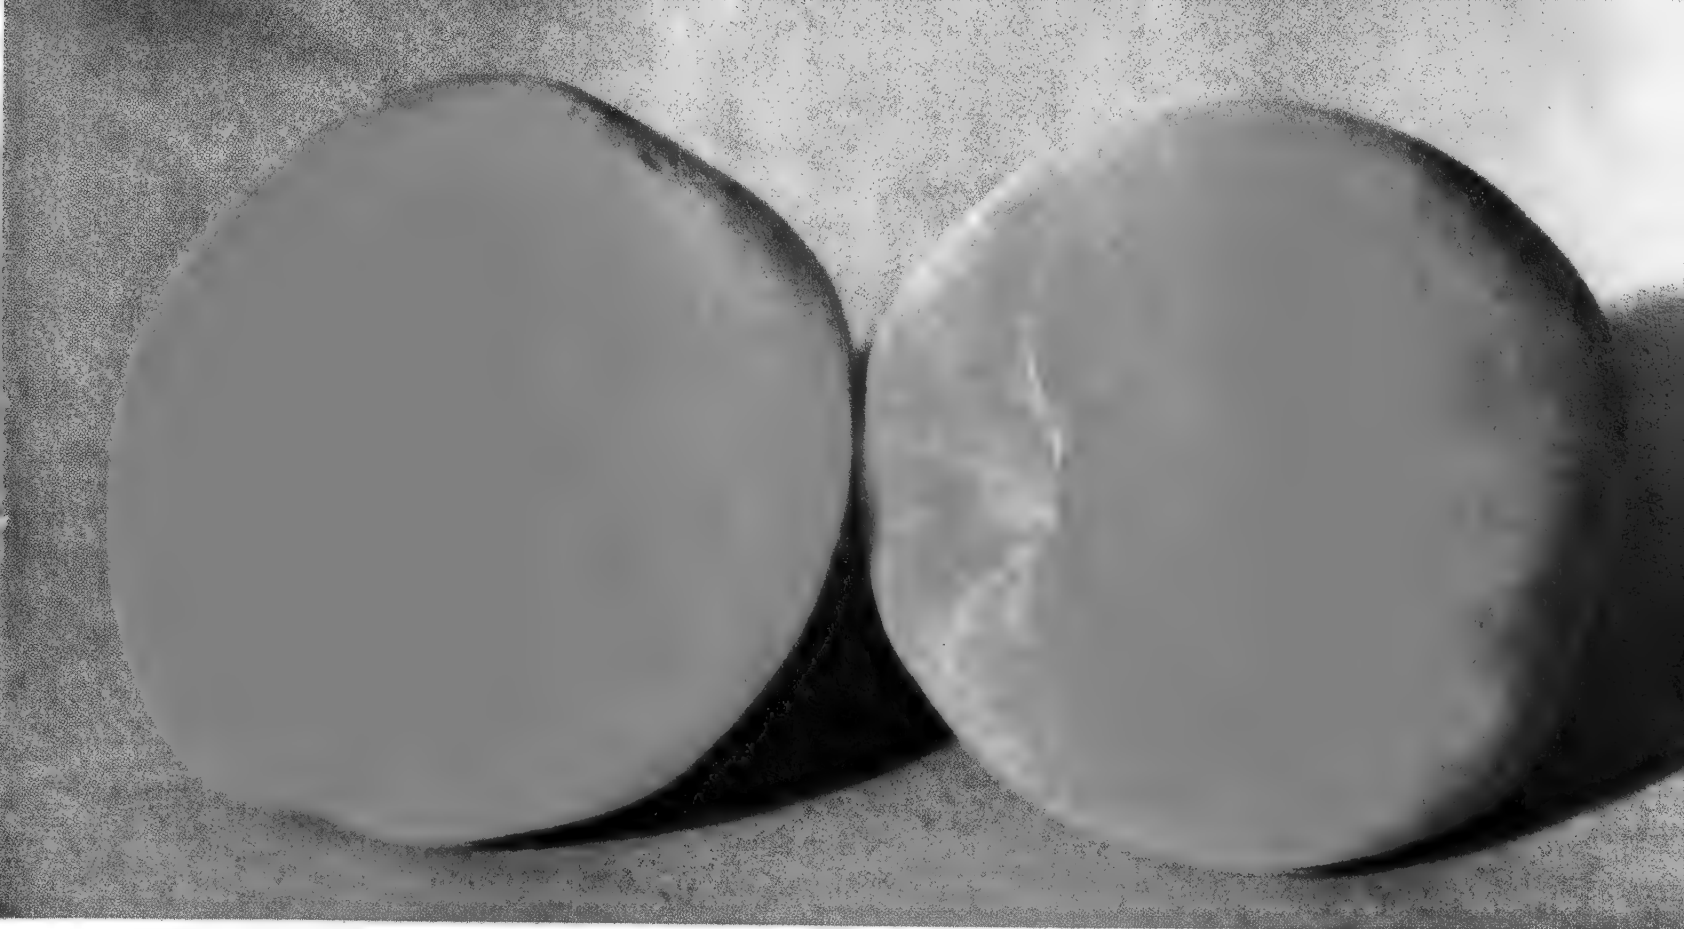

RIO OSO GEM

This California Peach is perfectly at home in Michigan. It ripens about September 20th; the fruit is large and of high quality. A fine yellow freestone Peach.

Sole propagation and distribution rights in Michigan have been granted to I. E. Ilgenfritz Sons Co.

Rio Oso Gem

J. H. Hale

J. H. HALE

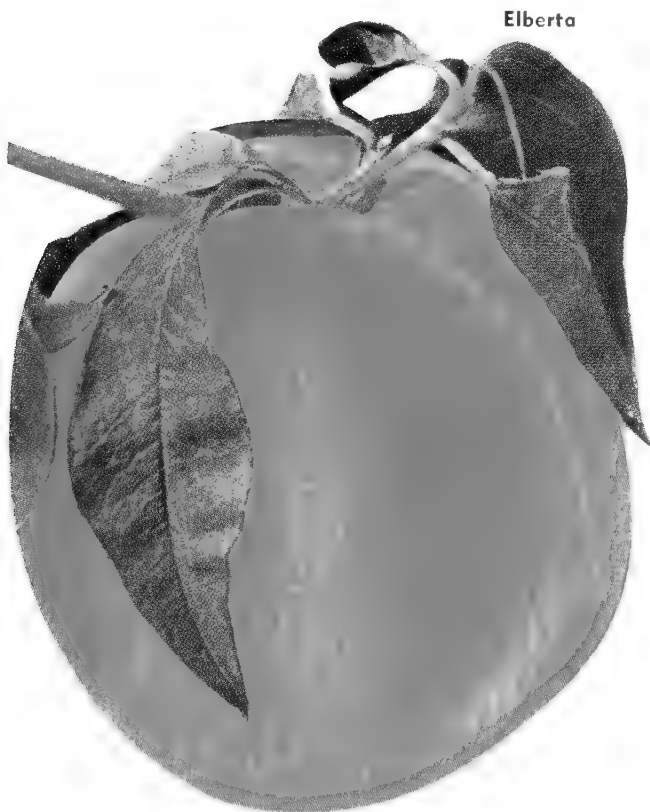

This handsome Peach ripens just before Elberta; exceptionally large beautiful fruit. It should always be planted with at least one other variety.

ELBERTA

A dependable producer, which bears young and is long lived. Ripens about September 15th.

GOLDEN JUBILEE

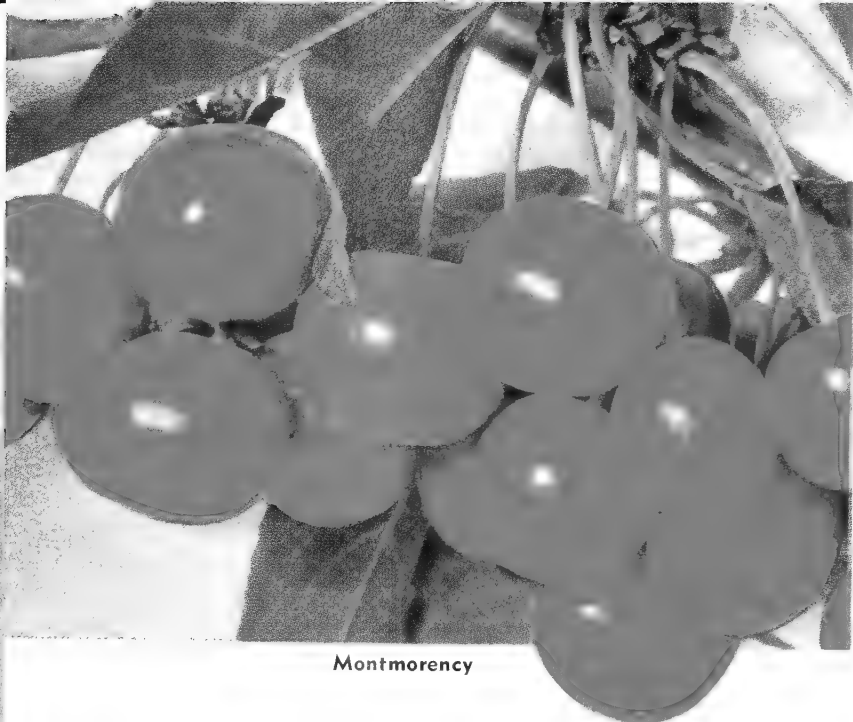

A leading, early, yellow, freestone, heavy bearing Peach that ripens about three weeks ahead of Elberta.

Elberta

Golden Jubilee

Montmorency

Cherries

Montmorency

(Above)

The big Pie-Cherry, often measuring one inch across. Ilgenfritz Montmorency is grown from record-bearing parent trees. It is the best Sour Cherry for canning.

Black Tartarian

(Below)

Early ripening with rich sweet flavor. The trees are hardy, bear young and abundantly.

Black Tartarian

Schmidt

Schmidt

(Above)

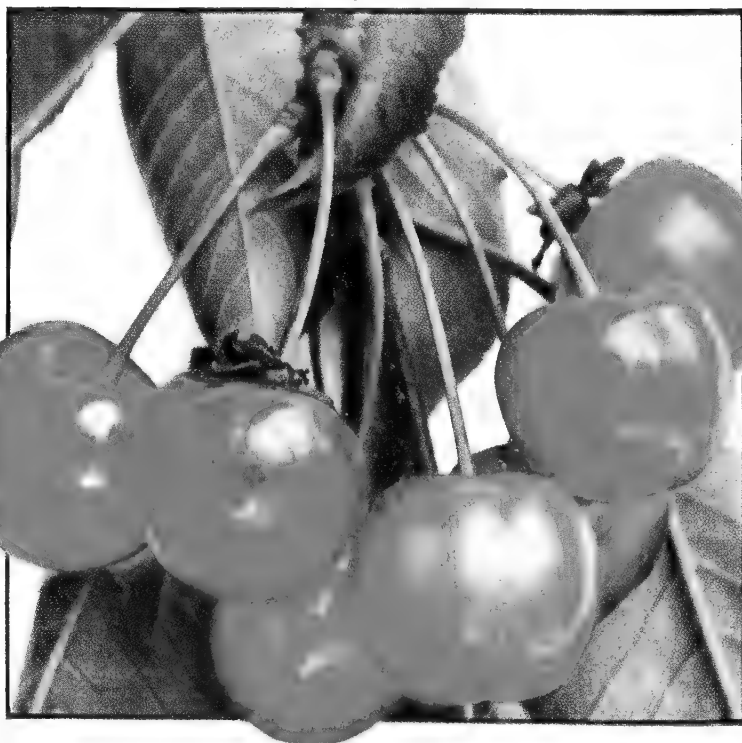

The large firm fruit is deliciously flavored. Best mid-season Sweet Cherry. Ripens later than Black Tartarian.

Napoleon (Royal Ann)

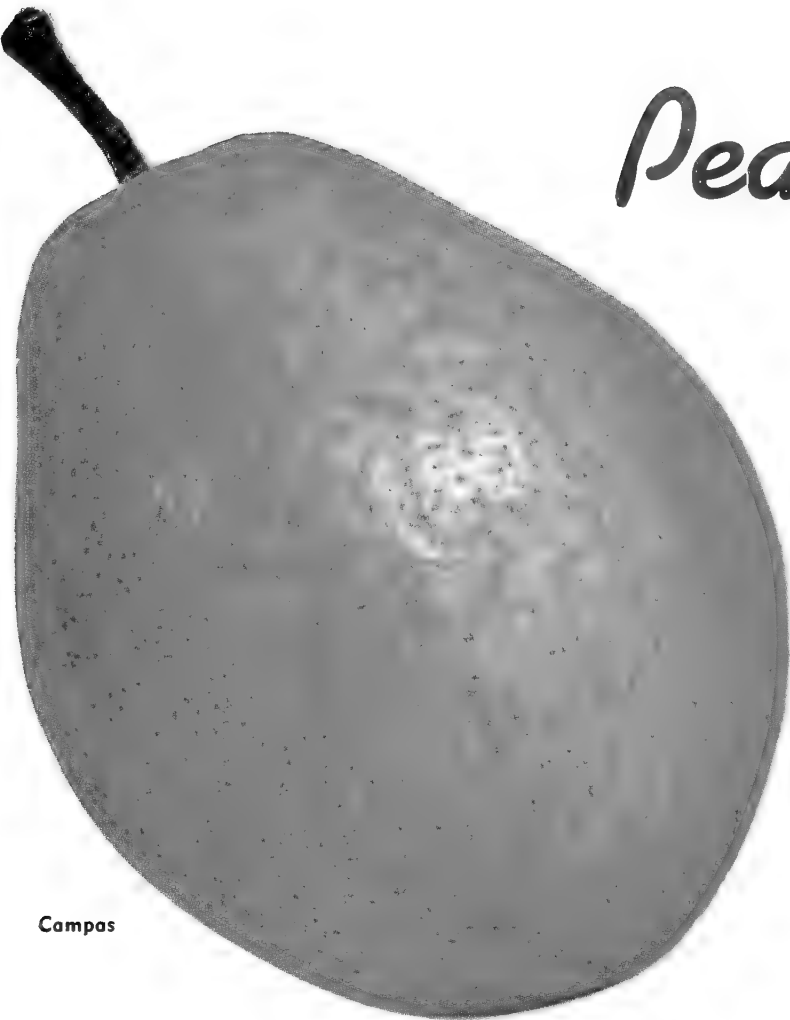

(Below)

We recommend it as the finest yellow Sweet Cherry. The fresh fruit is much used for desserts; it is also wonderful canned.

Napoleon

Pears

Campos

Campos

(Above)

Large yellow winter Pear. Good texture and flavor; much used for canning.

Conference

(Below)

Prolific bearer of high quality fruit. However, this Pear is somewhat smaller than Bartlett.

Conference

Bartlett

Bartlett

(Above)

The most popular Pear and once you have eaten one, you'll know why. Very juicy with unsurpassed flavor.

Clapp Favorite

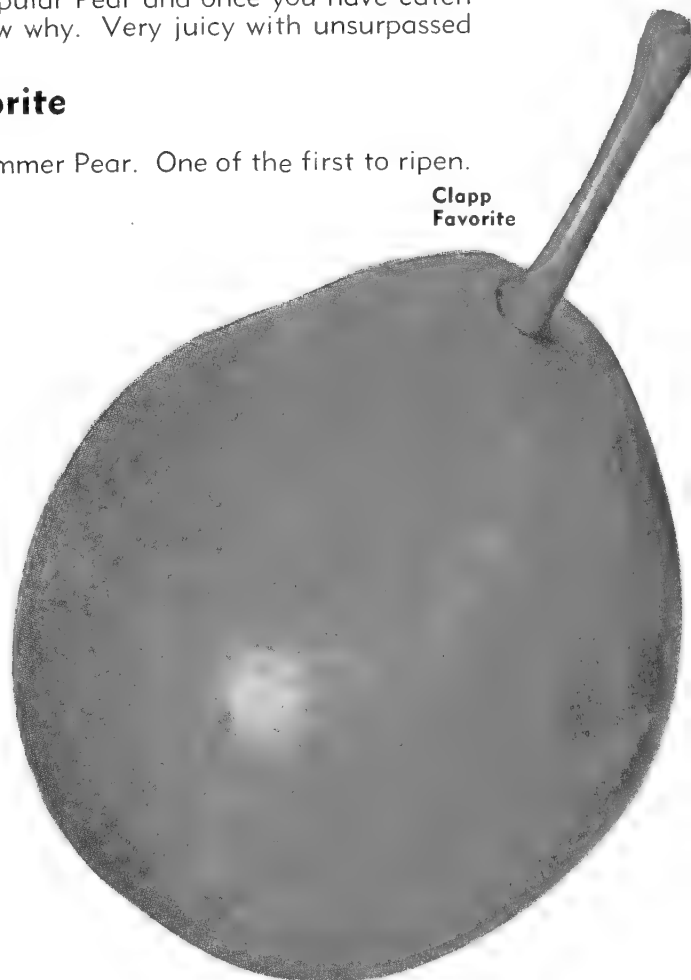

(Below)

Beautiful summer Pear. One of the first to ripen.

**Clapp
Favorite**

SINCE
1847

Moorpark Apricot

Moorpark

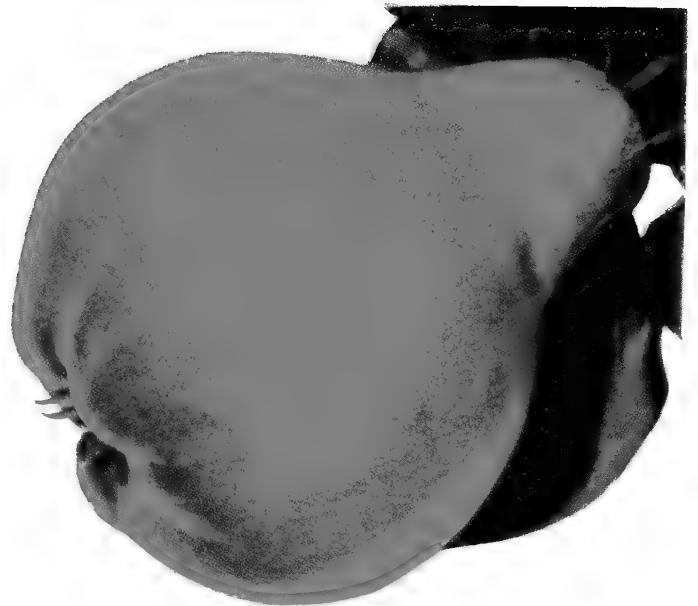

Very productive; large in size, color orange and red, freestone. Season: August.

Nectarine

Hunter

One of the largest Nectarines grown, freestone, yellow with red cheek. Extra hardy, young bearer. September 1st.

Orange Quince

Orange

Old favorite of high quality. Fruit yellow with tender flesh. Productive fruit bearer, season late autumn.

*Tree-Ripened Fruit
Has More Flavor*

Yellow Egg
Plum

PLUMS

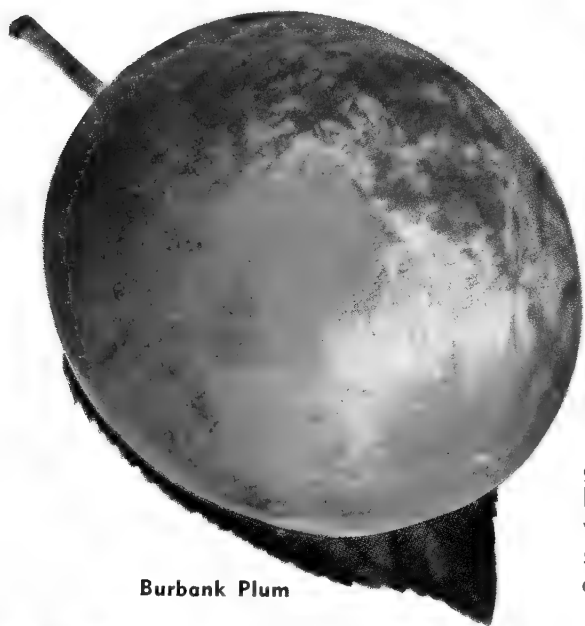

It takes at least two Plum trees to produce fruit. For instance, plant Italian Prune with Stanley, Green Gage, or Yellow Egg. A good mate for Burbank is Abundance.

Italian Prune

Nationally known leader for drying or canning. Fine, golden flesh; heavy yielder.

Italian Prune
(Fellenberg)

Burbank Plum

Burbank

A decorative tree with gnarled, horizontal branches covered with white flowers in early spring. The fruit tastes as good as it looks.

Stanley Prune

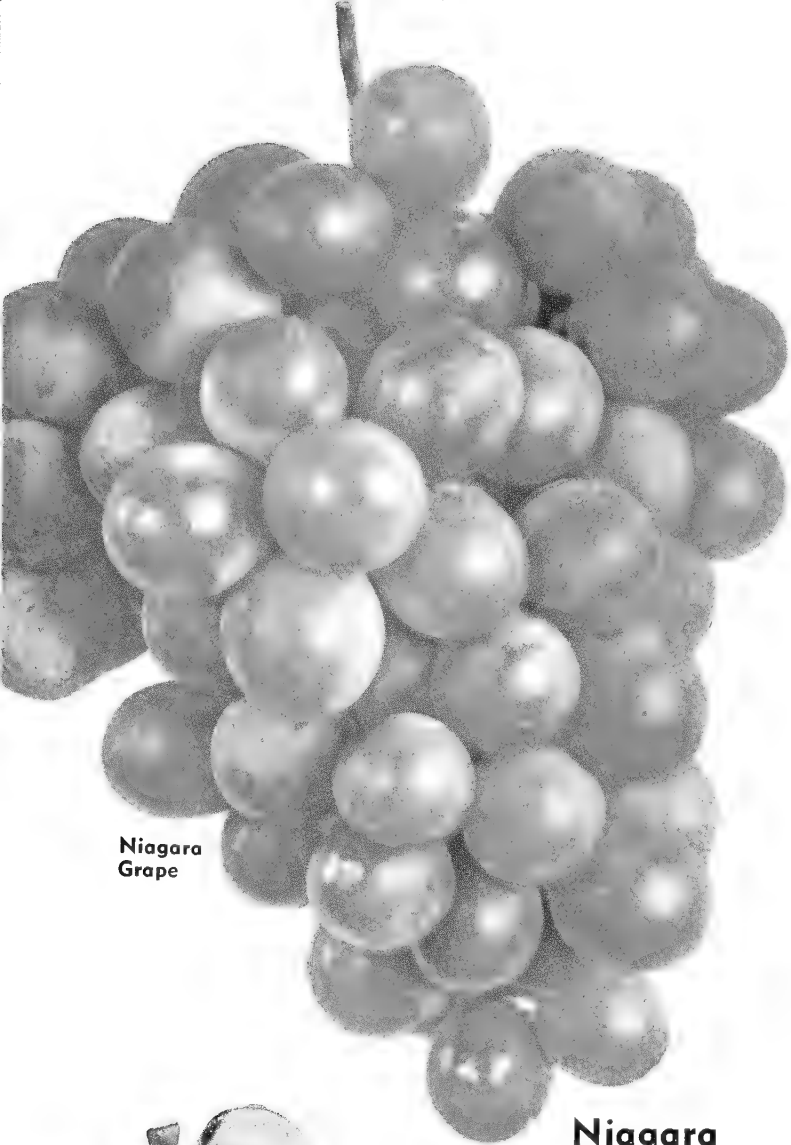

Young bearer of very sweet Plums. The juice stays deep red after canning.

Green Gage

Green Gage or Reine Claude is a heavy bearer and should be thinned. It has such a wonderful flavor when eaten fresh from the tree that seldom any are left for canning.

Green Gage Plum

**Niagara
Grape**

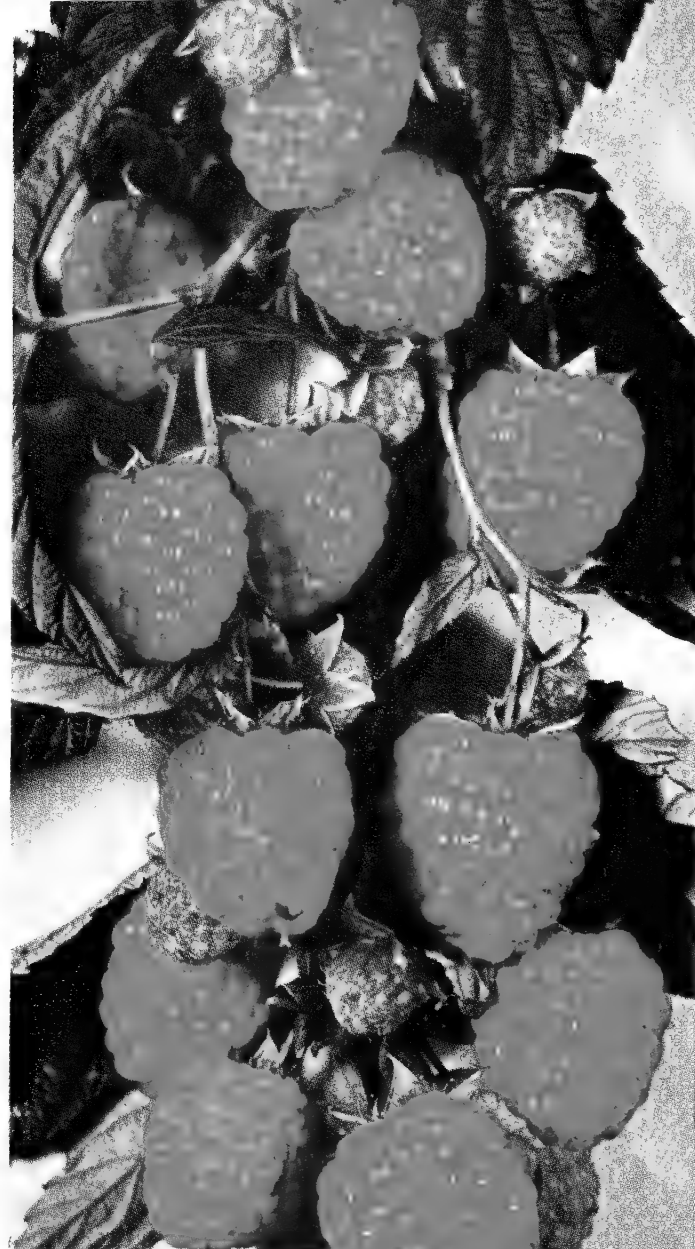

Concord Grape

Niagara

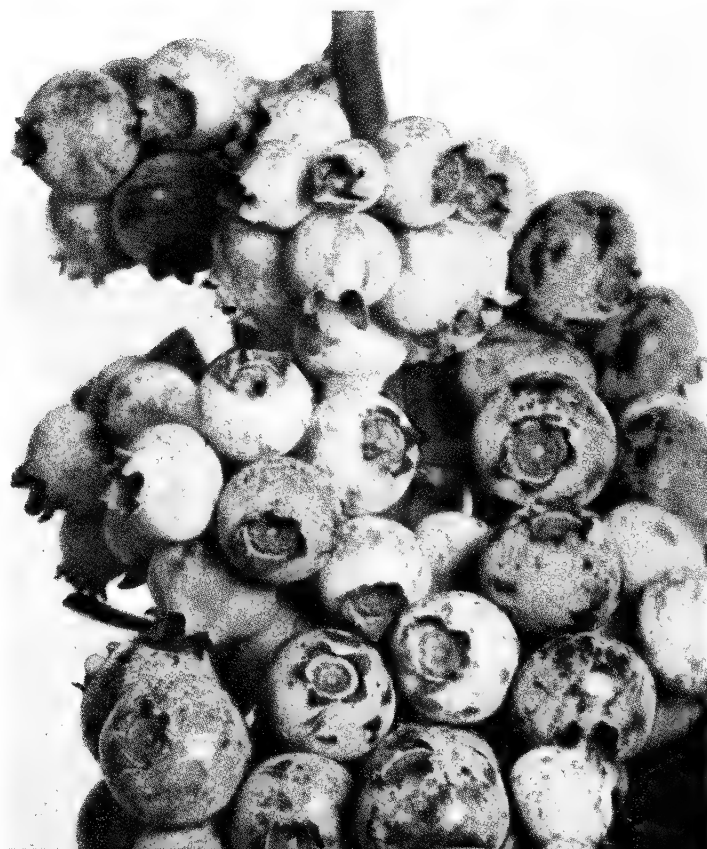

Most popular green Grape of excellent commercial qualities. Berries and bunches large. Very productive. Ripens mid-season with Concord.

Concord

The leading blue Grape. Vines vigorous and productive. Bunches large. Good for shipping and for all home uses. Ripens about September 15th.

Everbearing Raspberry, "Indian Summer"

**Giant
Blueberries**

Small Fruits

Cumberland

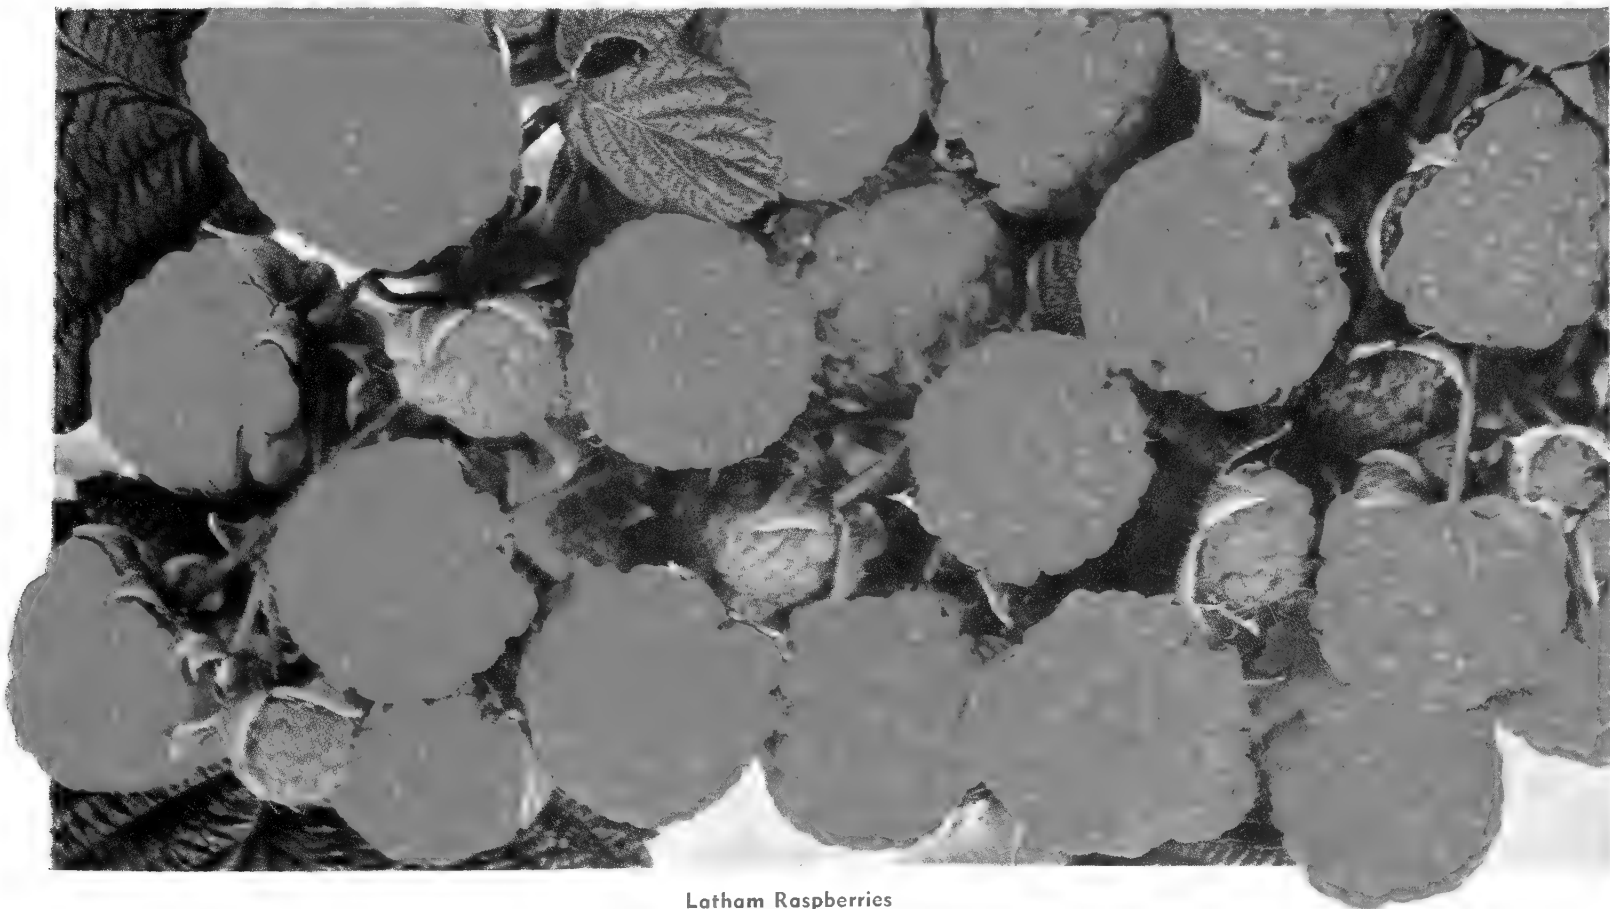

(Black Raspberry)

The old-fashioned Blackcap. A heavy yielder of large, firm berries; delicious flavor. Commercially perfect.

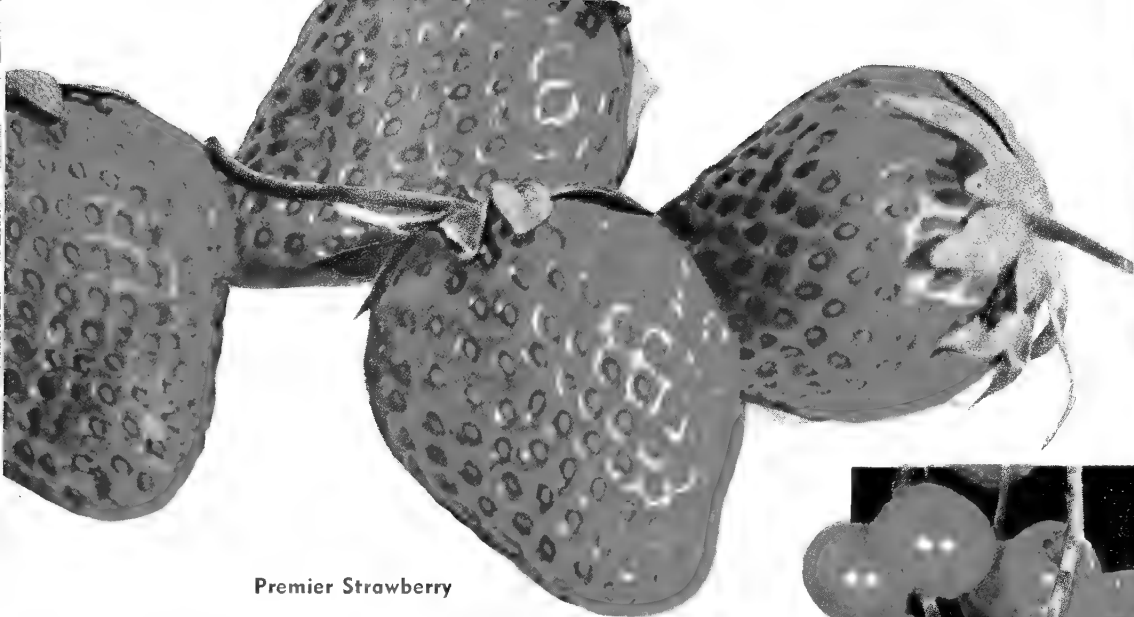

Latham

The famous Red Raspberry; luscious red berries, round, plump. Rich flavor, firm, excellent for shipping or canning. Mid-season ripening.

Latham Raspberries

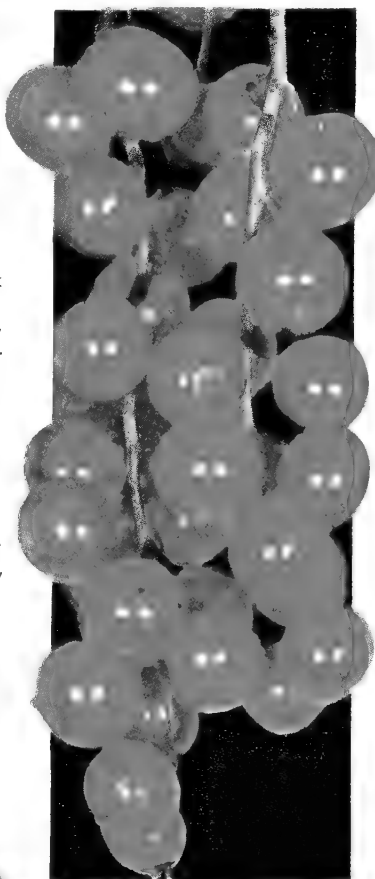

Premier Strawberry

Premier

This variety has become very popular because of its annual record crops. The berries are bright red, large and of good quality. Early ripening is another advantage.

Mastodon Everbearing Strawberry

The best known everbearer. The plants are productive and fruit through the summer until early October.

Red Lake Currant

Boysenberry

Boysenberry

The berries are up to two inches long. Trailing on fence or wires makes picking easier. Mulching of the plants with straw in late fall is recommended.

Red Lake Currant

Very vigorous and productive. The large bunches of berries have a fine flavor. A favorite variety with Ilgenfritz customers.
